*covering all body systems; a clear, engaging writing style; and full-color illustrations, this updated edition offers you everything needed for a successful lab experience. This edition features updated pre-lab quizzes at the beginning of each exercise, new Group Challenge activities, and an updated art program. A wide variety of laboratory exercises and activities gives students a hands-on lab experience, including organ and body dissection activities for the cat, sheep, and cow. Beautiful, full-color art and photos help students visualize anatomical structures for laboratory practice. Thorough, clearly-written exercises assist students in comprehending and retaining the material. They include background information, a list of objectives, step-by-step instructions, and exercise review sheets. Integrated to follow each lab exercise, the review sheets can be used for pre- or post-lab review. Human and cat anatomy dissection photographs/plates are included. The "Organ Systems Overview" dissection exercise includes instruction on both rat and human dissection. Color photographs of rat and human dissection views further enhance the exercise. The spiral binding gives students a useful, convenient format for taking notes during lab. Perforated pages make it convenient for students to tear out the Review Sheets.*

*Chemical engineers face the challenge of learning the difficult concept and application of entropy and the 2nd Law of Thermodynamics. By following a visual approach and offering qualitative discussions of the role of molecular interactions, Koretsky helps them understand and visualize thermodynamics. Highlighted examples show how the material is applied in the real world. Expanded coverage includes biological content and examples, the Equation of State approach for both liquid and vapor phases in VLE, and*
