An understanding of psychology—specifically the psychology behind how users behave and interact with digital interfaces—is perhaps the single most valuable nondesign skill a designer can have. The most elegant design can fail if it forces users to conform to the design rather than working within the “blueprint” of how humans perceive and process the world around them. This practical guide explains how you can apply key principles in psychology to build products and experiences that are more intuitive and human-centered. Author Jon Yablonski deconstructs familiar apps and experiences to provide clear examples of how UX designers can build experiences that adapt to how users perceive and process digital interfaces. You'll learn: How aesthetically pleasing design creates positive responses The principles from psychology most useful for designers How these psychology principles include Fit's law, Jakob's law , and Hick's law Ethical implications of using psychology in design A framework for applying these principles

Through seven London case studies of communities opposing social housing demolition and/or proposing community-led plans, Community-Led Regeneration offers a toolkit of planning mechanisms and other strategies that residents and planners working with communities can use to resist demolition and propose community-led schemes. The case studies are Walthamstow and Elgins Community Homes, West Ken and Gibbs Green Community Homes, Cressingham Gardens Community, Greater Carpenters Neighbourhood Forum, Focus E15, People's Empowerment Alliance for Custom House (PEACH), and Alexandra and Ainsworth Estates. Together, these case studies represent a broad overview of groups that formed as a reaction to proposed demolitions of residents' housing, and groups that formed as a way to manage residents' homes and public space better. Drawing from the case studies, the toolkit includes the use of formal planning instruments, as well as other strategies such as sustained campaigning and activism, forms of citizen-led design, and alternative proposals for the management and ownership of housing by communities themselves. Community-Led Regeneration targets a diverse audience: from planning professionals and scholars working with communities, to housing activists and residents resisting the demolition of their neighbourhoods and proposing their own plans.

An exploration of how design might be led by marginalized communities, dismantle structural inequality, and advance collective liberation and ecological survival. What is the relationship between design, power, and social justice? “Design justice” is an approach to design that is led by marginalized communities and that aims explicitly to challenge, rather than reproduce, structural inequalities. It has emerged from a growing community of designers in various fields who work closely with social movements and community-based organizations around the world. This text explores the design practices, demonstrates how universalist design principles and practices erase certain groups of people—specifically, those who are intersectionally disadvantaged or multiply burdened under the matrix of domination (while supremacist heteropatriarchy, ableism, capitalism, and settler colonialism)—and invites readers to “build a better world, a world where many worlds fit, linked worlds of collective liberation and ecological sustainability.” Along the way, the book documents a multitude of real-world community-led design projects, each grounded in a particular social movement. Design Justice goes beyond recent calls for design for good, user-centered design, and employment diversity in the technology and design professions; it connects design to larger struggles for collective liberation and ecological survival.

The baby owls came out of their house, and they sat on the tree and waited. A big branch for Sarah, a small branch for Percy, and an old piece of ivy for Bill. When three baby owls awake one night to find their mother gone, they can't help but wonder where she is. Stunning illustrations from unique and striking perspectives capture the owls as they worry about their mother: What is she doing? When will she be back? What scary things move all around them? Not surprisingly, a joyous flapping and dancing and bouncing greets her return, lending a celebratory tone to the ending of this comforting tale. Never has the plight of young ones who miss their mother been so simply told or so beautifully rendered.

The first monograph, design manual, and manifesto by Michael Bierut, one of the world's most renowned graphic designers—a career retrospective that showcases more than thirty-five of his most noteworthy projects for clients as the Brooklyn Academy of Music, the Yale School of Architecture, the New York Times, Saks Fifth Avenue, and the New York Jets, and reflects eclectic enthusiasm and accessibility that has been the hallmark of his career. Protégé of design legend Massimo Vignelli and partner in the New York office of the international design firm Pentagram, Michael Bierut has had one of the most varied and successful careers of any living graphic designer, serving a broad spectrum of clients as diverse as Saks Fifth Avenue, Harley-Davidson, the Atlantic Monthly, the William Jefferson Clinton Foundation, Billboard, Princeton University, the New York Jets, the Brooklyn Academy of Music, and the Morgan Library. How to, Bierut's first career retrospective, is a landmark work in the field. Featuring more than thirty-five of his projects, it reveals his philosophy of graphic design—how to use it to sell things, explain things, make things better, and (and every once in a while) change the world. Specially chosen to illustrate the breadth and reach of graphic design today, each entry demonstrates Bierut's eclectic approach. In his entertaining voice, the artist walks us through each from start to finish, mixing historic images, preliminary drawings (including full-size reproductions of the notebooks he has maintained for more than thirty-five years), working models and rejected alternatives, as well as the finished work. Throughout, he provides insights into the creative process, his working life, his relationship with clients, and the struggles that any design professional faces in bringing innovative ideas to the world. Offering insight and inspiration for artists, designers, students, and anyone interested in how words, images, and ideas can be put together, How to provides insight to the design process of one of this century's most renowned creative minds.
