

Accounting Horngren Harrison Bamber 5th Edition

Appropriate for Introduction to Business courses at both the university and college levels. Back by popular demand, Business Essentials, Canadian Third Edition, is the perfect option for those who want a "no-nonsense" approach for an introduction to business course. It retains the smooth, conversational writing style, extensive pedagogy, and well-integrated supplements package of the parent text, Business, Canadian Fourth Edition. Thoroughly updated and condensed, this text engages the reader by providing accurate and focused coverage in a brief, inexpensive, and high quality format. Not only does this book reflect the changes occurring in the practice of business, it also meets the changing needs of students and teachers in the field.

Sport Funding and Finance is written for students who wish to get both a broad and deep understanding of the commercial and financial structure of sport in various contexts. To this end, the book provides students with a three-tiered learning experience. The first tier provides students with a broad appreciation of the commercial evolution of sport, and how it has managed to move from the kitchen-table model to the corporate-boardroom model, and along the way become quite a sophisticated industry from a financial viewpoint. Attention will be given to the commercial development of sport using USA and European pro-sport leagues as a benchmark. Changes in the funding arrangement of sport will be highlighted, and the different funding sources will be examined in detail.

The second tier will give students a sound grounding in the principles and practice of effective financial management. Students will be introduced to basic accounting principles and practice, and then led into more complex issues of pricing, costing, financial analysis, budgeting, and financial projections. The third tier will explore future developments in sport finance and funding, and examine how they will impact on sport management knowledge and skill requirements. Within this framework, the book will provide students with two types of learning outcomes. The first outcome is knowledge based and will include the following: * a grounded understanding of the commercial evolution of sport from 1950–the present * an understanding of the different commercial phases sport goes through to reach commercial maturity * an appreciation of the major global sport events and leagues, and their financial arrangements. * an insight into the financial strengths and weaknesses of contemporary sport. The second outcome is skill-based, and by reading the book and completing the cases students will be able to: * identify the different legal structures of sport organisations and the financial implications of each structure * explain the main accounting conventions and how they impact on the financial management of sport organisations * identify the foundations of double entry bookkeeping * construct a simple set of accounts for a sport organisation * use financial ratio analysis to evaluate the financial performance of sport organisations * understand different methods of constructing budgets, and use them to control the financial operation of a sport organisation * set up models for identifying and managing costs * identify different methods for setting prices for sport goods and services, and to apply them to specific settings and events. * undertake a financial planning exercise and/or feasibility study for a sport organisation or facility * undertake a cost-benefit analysis for a sport organisation event. Therefore, students will obtain both a broad knowledge of the commercial evolution of sport and its current financial operation, AND the necessary skills for understanding and supervising the financial operations of a sport organisation.

Making Decisions and Motivating Performance

"Business Schools Face Test of Faith." "Is It Time to Retrain B-Schools?" As these headlines make clear, business education is at a major crossroads. For decades, MBA graduates from top-tier schools set the standard for cutting-edge business knowledge and skills. Now the business world has changed, say the authors of Rethinking the MBA, and MBA programs must change with it. Increasingly, managers and recruiters are questioning conventional business education. Their concern is cultural awareness and global perspectives they need. Newly minted MBAs lack essential leadership skills. Creative and critical thinking demand far more attention. In this compelling and authoritative new book, the authors: · Document a rising chorus of concerns about business schools gleaned from extensive interviews with deans and executives, and from a detailed analysis of current curricula and emerging trends in graduate business education · Provide case studies showing how concrete ideas for how business schools can surmount the challenges that come with reinvention, including securing faculty with new skills and experimenting with new pedagogies Rich with examples and thoroughly researched, Rethinking the MBA reveals why and how business schools must define a better pathway for the future.

Garrison - Your guide through the challenging waters of managerial accounting. For centuries, the lighthouse has stood as a beacon of guidance for mariners at sea. More than an aid to navigation, the lighthouse symbolizes safety, permanence, reliability, and the comforts of the familiar. For this reason, we have chosen to illustrate the Canadian eighth edition of Managerial Accounting by Garrison, Chesley, Carroll and Webb with an image that encapsulates the greatest strengths of accounting. It identifies the three functions managers must perform within their organizations—plan operations, control activities, and make decisions—and explains what accounting information is necessary for these functions, how to collect it, and how to interpret it. Managerial Accounting8ce focuses, now as in the past, on three qualities: Relevance, Balance and Clarity. The authors' steady focus on these core elements has led to tremendous results! Cost Accounting: A Managerial Emphasis.

Go beyond managerial accounting theory to the techniques used in management today. Managerial Accounting: Making Decisions and Motivating Performance enables managers and business owners to attain the core skills they need to become integral members of their company's decision-making teams. This new program from established authors Srikant M. Datar and Madhav Rajan emphasizes decision-making and the effects of decisions. While many texts teach the theories and frameworks of management education, Managerial Accounting goes further by covering the capabilities and techniques necessary for effective management practice, as well as fostering attitudes that typify integrity, honesty, and fairness. 0132816245 / 9780132816243 Managerial Accounting: Making Decisions and Motivating Performance Plus NEW MyAccountingLab with Pearson eText -- Access Card Package Package consists of: 0132829444 / 9780132829441 NEW MyAccountingLab with Pearson eText -- Access Card -- for Managerial Accounting: Making Decisions and Motivating Performance, 1/e 0137024878 / 9780137024872 Managerial Accounting: Making Decisions and Motivating Performance, 1/e Leadership, adaptability, value creation. These are the skills necessary for tomorrow's managers. Allen Amason approaches the topic of strategic management with these traits in mind. Rather than simply teaching theory and research, he seeks to communicate to them the fundamental keys to how strategy works. This book is designed to help students think critically and understand fully how to strategically manage their future firms. In so doing, it will enable them to adapt and learn, even as their circumstances change; to apply sound logic and reasoning, even in new and unfamiliar settings. By conveying enduring and fundamental principles of economic and human behavior rather than simply reporting on the latest innovations, this book succeeds in preparing students to excel in the business environment over time, regardless of how it evolves.

Accounting Information for Business Decisions is a business-focused introduction to Accounting for all students - not just those intending to be Accounting majors. Lead students through the real-world business cycle and how accounting information informs decision-making. Departing from the traditional approach taken by other introductory accounting textbooks, students apply both managerial and financial approaches within the topics examined in each chapter, to see the direct impact that Managerial Accounting decisions make on the Financial Accounting processes (and vice versa). The conversational writing engages students in the theoretical content and how it applies to contemporary real-world scenarios. Students follow a retail coffee business in the relatable Cafe Revive running case study integrated into every chapter, to learn about applying accounting issues in the real world. Premium online teaching and learning tools are available on the MindTap platform. Learn more about the online tools cengage.com.au/mindtap

Advanced Accounting delivers an in-depth, comprehensive introduction to advanced accounting theory and application, using actual business examples and relevant news stories to demonstrate how core principles translate into real-world business scenarios. Clearly defined and logically organized Learning Objectives aid in student comprehension, while highlighted Related Concepts illustrate how individual concepts fit into the larger picture. Short answer questions throughout the chapter allow students to test their knowledge before reaching the more in-depth end-of-chapter questions, promoting a deeper understanding of both technical and conceptual aspects of the field. Written by active accounting researchers, this text brings clarity and flexibility to the central ideas underlying business combinations, consolidated financial statements, foreign currency transactions, partnerships, non-profit accounting and more. This new Seventh Edition has been updated to reflect the latest changes to FASB and GASB standards, allowing students to build a skill set based on up-to-date practices. With a student-oriented pedagogy designed to enhance comprehension, promote engagement, and build real-world understanding, this user-friendly book provides an essential foundation in current advanced accounting methods and standards.

Extraordinary and up-to-date problems have been added to this edition with other new features including text learning aids to help students understand accounting and streamlined text discussions for more effective understanding of core topics.

Intended to be used in a one-semester course covering modern physics for students who have already had basic physics and calculus courses. Focusing on the ideas, this book considers relativity and quantum ideas to provide a framework for understanding the physics of atoms and nuclei.

The Demo Docs System of instruction replicates the classroom experience by providing more "I get it" moments outside of class. We've talked to tons of POA instructors and our editors have even taken the accounting course (numerous times!) to figure out the following issue in this course that is consistent: & Students understand (or "get it") right after you do a problem in class, but as soon as they leave class, with each passing hour, their ability to do the problems again and complete their homework diminishes to the point of them either having to come to office hours to get help, or they just quit and get behind in the course.& On top of this, you can end up getting behind in the course as well, in order to keep everyone on track.& The Demo Docs system helps to recreate the "I get it" moments outside of class-keeping both you and the students on track.
