The explosive growth of the Internet and the Web have created an ever-growing demand for information systems, and ever-growing challenges for Information Systems Engineering. The series of Conferences on Advanced Information Systems Engineering (CAiSE) was launched in Scandinavia by Janis Bubenko and Arne Solvberg in 1989, became an important European conference, and was held annually in major European sites throughout the 1990s. Now, in its 14th year, CAiSE was held for the first time outside Europe, showing

In total, the conference received 173 paper submissions, the highest number ever for a CAiSE conference. Of those, 42 were accepted as regular papers and 26 as short (poster) papers. In addition, the conference received 12 proposals for workshops of which 8 were approved, while 4 tutorials were selected from 15 submissions. The technical program was put together by an international

Decisions on all submissions were reached at a program committee meeting in Toronto on January 26-27, 2002. Workshop and tutorial proposals were handled separately by committees chaired by Patrick Martin (workshops), and Jarek Gryz and Richard Paige (tutorials). We wish to extend a great “ THANK YOU! ” to all members of the program and organizing committees for their volunteer contributions of time and expertise. The fact that so many busy

resource for both developing and executing a loss control audit program. Written for professionals in the fire service, loss prevention, and safety management as well as those studying the fields, this reference addresses loss control auditing from the perspectives of workplace safety, physical security, and fire risks. The text focuses on the three core areas of an audit: documentation review, physical inspection, and employee interviews. It also presents a three-phase model—pre-audit, audit, and post audit activities—which can be used for all three core areas.

Cutting Edge Internal Auditing provides guidance and knowledge for every internal auditor, encouraging each to pioneer new ground in the development of their professional practices in all risk

management, control and governance processes. Serving as an excellent reference guide that develops a pattern of internal auditing now and for the future, this book explores the concept of 'cutting edge' internal auditing as an imaginative adventure: demonstrating how this has influenced and will continue to influence the development of professionalism in internal auditing. Built on the foundations of Jeffrey Ridley's extensive internal auditing experience across the public and private sectors, the author uses his articles and research to explore and develop the motivations, goals and

categories of innovation in internal auditing today. It develops and brings up to date an imaginative internal auditing model, created and used by the author in the early 1980s, drawing on research and guidance by The Institute of Internal Auditors Inc., its Research Foundation and the Institute of Internal Auditors - UK and Ireland. Each chapter stands alone by focusing on an individual internal auditing theme, considered from both the perspective of internal auditing and its customers to suggest an appropriate vision as a goal for every internal audit activity. Each chapter also includes self-

assessment questions to challenge the readers understanding of its messages. Companion website contains some of the author's training slides and seventy case studies, many written by leading internal audit practitioners, this book creates a vision for future cutting edge internal auditing.
