

Cost Management A Strategic Emphasis 6 Edition

Cost Management: A Strategic Emphasis, by Blocher/Stout/Juras/Smith is dedicated to answering the question: Why Cost Management? It answers this question by providing cost-management tools and techniques needed to support an organization's competitiveness, improve its performance, and help the organization accomplish its strategy. The text is written to help students understand the broader role of cost accounting in helping an organization succeed - and not just the measurement of costs. While the text does include coverage of traditional costing topics (e.g., job-order costing, process costing, service-department cost allocations, and accounting for joint and by-products), its primary strength is the linkage of these topics, as well as more contemporary topics, to an organization's strategy. And with Connect, an easy-to-use homework and learning management solution that embeds learning science and award-

The New Tool for Competitive Advantage Cases and Readings for Use with Cost Management Cost Management: A Strategic Emphasis

All organizations, institutions, business processes, markets and strategies have one aim in common: the reduction of transaction costs. This aim is pursued relentlessly in practice, and has been perceived to bring about drastic changes, especially in the recent global market and the cyber economy. This book analyzes and describes "transactions" as a model, on the basis of which organizations, institutions and business processes can be appropriately shaped. It tracks transaction costs to enable a scientific approach instead of a widely used "state-of-the-art" approach, working to bridge the gap between theory and practice. This open access book analyzes and describes "transactions" as a model...

For research in all subjects and among different philisopical paradigms, research methodologies form one of the key issues to rely on. This volume brings a series of papers together, which present different research methodologies as applied in supply chain management. This comprises review oriented papers that look at what kind of methodologies have been applied, as well as methodological papers discussing new developments needed to successfully conduct research in supply chain management. The third group is made up of applications of the respective methodologies, which serve as examples on how the different methodological approaches can be applied. All papers have undergone a review process to ensure their quality. Therefore, we hope that this book will serve as a valid source for current and future researchers in the field. While the workshop on “Research Methodologies in Supply Chain Management” took place at the Supply Chain Management Center, Carl von Ossietzky Univ- sity in Oldenburg, Germany, it is based on a collaboration with the Supply Chain Management Group of the Department of Operations Management at the Cop- hagen Business School and the Department of Production Management at the Vienna University of Economics and Business Administration. We would like to thank all those who contributed to the workshop and this book.

Supply Chain Management and Cost Management are important developments helping companies to respond to increased global competition and demanding customer needs. Within the 23 chapters of the book, more than 35 authors provide insights into new concepts for cost control in supply chains. The frameworks presented are illustrated with case studies from the automotive, textile, white goods, and transportation industry as well as from retailing. Academics will benefit from the wide range of approaches presented, while practitioners will learn from the examples how their own company and the supply chains which they compete in, can be brought to lower costs and better performance.

SEWMEX

Strategic Cost Management

A Strategic Emphasis (with Cases and Readings Package).

This case focuses on short-term profit planning for SEWMEX--a newly formed Mexican subsidiary of a U.S. company. The case is based on a real company in the sewing industry and as such forces students to think critically about the application of CVP concepts to a real life situation. Sensitivity analysis is required to determine the impact of changes in production efficiencies on CVP relationships and profitability for the SEWMEX plant. Some applications of Excel are required to complete the case. Students are required to construct a written summary report regarding major issues raised in the case. Optional requirements focus on various issues regarding foreign exchange rates.

Because of the richness of the case, it is targeted for use at the graduate level (e.g., MBA managerial accounting) or at an upper-level undergraduate course for accounting majors (e.g., cost accounting).
