Writing the war on terrorism' examines the public language of the war on terrorism, and the way that rhetoric has been used to justify the global counter-terrorism offensive as a response to 9/11. It discusses how language has been used to deliberately manipulate public anxiety about terrorist threats to gain support for military action, and how the abuse of Iraqi prisoners has been normalised through rhetoric and practice. . It explains how the war on terrorism has been reproduced and amplified by key social actors and how it has

become the dominant political narrative in America today, enjoying widespread bipartisan and popular support. The author argues that the normalisation and institutionalisation of the administration's current counter-terrorism approach is damaging to society's ethical values and to democratic political participation. Lying at the intersection of International Relations, American politics, terrorism studies, discourse analysis, communication studies and cultural studies, this book will have genuine interdisciplinary appeal.

The issue of gender in organizations has attracted much attention and debate over a number of years. The focus of examination is inequality of opportunity between the genders and the impact this has on organizations, individual men and women, and society as a whole. It is undoubtedly the case that progress has been made with women participating in organizational life in greater numbers and at more senior levels than has been historically the case, challenging notions that senior and/or influential organizational and political roles remain a masculine domain. The Oxford Handbook of Gender in Organizations is a comprehensive analysis of thinking and research on gender in organizations with original contributions from key international scholars in the field. The Handbook

comprises four sections. The first looks at the theoretical roots and potential for theoretical development in respect of the topic of gender in organizations. The second section focuses on leadership and management and the gender issues arising in this field; contributors review the extensive literature and reflect on progress made as well as commenting on hurdles yet to be overcome. The third section considers the gendered nature of careers. Here the focus is on querying traditional approaches to career, surfacing embedded assumptions within traditional approaches, and assessing potential for alternative patterns to evolve, taking into account the nature of women's lives and the changing nature of organizations. In its final section the Handbook examines

masculinity in organizations to assess the diversity of masculinities evident within organizations and the challenges posed to those outside the norm. In bringing together a broad range of research and thinking on gender in organizations across a number of disciplines, sub-disciplines, and conceptual perspectives, the Handbook provides a comprehensive view of both contemporary thinking and future research directions.

The 4th International Conference on Hemochromatosis and the 11th International Conference on Iron and Iron Proteins took place in Jerusalem on April 27 -30 and on May 2 -7 1993, respectively. The first, a clinical meeting, and the second, a forum designed primarily for basic scientists. Both meetings are held regularly on alternate years and represent probably the most important forum for the exchange of information in iron research.
