*Fifty Readings in Philosophy is a flexible and affordable collection of classic and contemporary primary sources in philosophy. The readings cover all the main topics of Western philosophy, each one carefully edited to be long enough to present a self-contained argument but not so lengthy that students lose track of the main point. Introductions and explanatory notes make the readings accessible to students. All these features have made this book a proven pedagogical success and a best-selling reader in introductory philosophy.*

*Focusing on individuals whose ideas shaped intellectual life between 400 and 1500, this book is an accessible guide to those religious, philosophical and political concepts central to the medieval worldview.*

Scholars have traditionally used the Aristotelian commentators as sources for lost philosophical works and occasionally also as aids to understanding Aristotle. In H. J. Blumenthal's view, however, the commentators often assumed that there was a Platonist philosophy to which not only they but Aristotle himself subscribed. Their expository writing usually expressed their versions of Neoplatonist philosophy. Blumenthal here places the commentators in their intellectual and historical contexts, identifies their philosophical views, and demonstrates their tendency to read Aristotle as if he were a member of their philosophical circle. This book focuses on the commentators' exposition of Aristotle's treatise *De anima* (*On the Soul*), because it is relatively well documented and because the concept of soul was so important in all Neoplatonic systems. Blumenthal explains how the Neoplatonizing of Aristotle's thought, as well as the widespread use of the commentators' works, influenced the understanding of Aristotle in both the

Women were involved in every popular philosophy in the first century, and the participation of women reaches back to the Greek origins of these schools. Philosophers often taught their daughters, wives, and other friends the basic tenets of their thinking. The Isthmian games and a tolerance for independent thinking made Corinth an attractive place for philosophers to engage in dialogue and debate, further facilitating the philosophical education of women. The activity of philosophically educated women directly informs our understanding of 1 Corinthians when Paul uses concepts that also appear in popular moral philosophy. This book explores how philosophically educated women would interact with three such concepts: marriage and family, patronage, and self-sufficiency.

***Logic and Representation brings together a collection of essays, written over a period of ten years, that apply formal logic and the notion of explicit representation of knowledge to a variety of problems in artificial intelligence, natural language semantics and the philosophy of mind and language. Particular attention is paid to modelling and reasoning about knowledge and belief, including reasoning about one's own beliefs, and the semantics of sentences about knowledge and belief. Robert C. Moore begins by exploring the role of logic in artificial intelligence, considering logic as an analytical tool, as a basis for reasoning systems, and as a programming language. He then looks at various logical analyses of propositional attitudes, including possible-world models, syntactic models, and models based on Russellian propositions. Next Moore examines autoepistemic logic, a logic for modelling reasoning about one's own beliefs.***

***Rounding out the volume is a section on the semantics of natural language, including a survey of problems in semantic representation; a detailed study of the relations among events, situations, and adverbs; and a presentation of a unification-based approach to semantic interpretation. Robert C. Moore is principal scientist of the Artificial Intelligence Center of SRI International.***

Sir Anthony Kenny tells the fascinating story of the development of philosophy from the early 19th to the late 20th century. He guides the reader through the ideas of such great thinkers as Schopenhauer, Nietzsche, Heidegger, Sartre, Marx, Wittgenstein, and Russell. This volume concludes Kenny's magisterial New History of Western Philosophy.

A specific form of understanding of evil, in the problem of evil debate, gets assumed among a variety of materialistic naturalists. Owing to their physicalist and, in some cases, behaviorist philosophies, this understanding assumes a hedonistic view of pain that reduces valuation to pleasure and pain. Herein, all forms of good and evil get reduced to pleasure and pain. This work reorients the debate toward a more biblical understanding of evil based on an essentialist reading of ethics. The book argues that the hedonistic understanding of value characterizing prominent naturalistic materialists, such as those alluded to by J. L. Mackie, semantically seems to entail either a synonymous or a near synonymous relationship between evil and pain. The book further argues that this understanding, given the essentialist reading of ethics, seems wrongheaded. By reorienting the contours of the debate, it suggests that the problem of pain might, in effect, be quite different from the problem of evil and that neither problem necessarily entails the other. Seen in this way, neither problem casts doubt on belief in God's existence.

***This provocative study examines Theodore Roosevelt's ideas about race, focusing especially on his attitude toward blacks, American Indians, immigration, and imperialism. Thomas G. Dyer gives careful attention to formal and nonformal aspects of Roosevelt's thought, as revealed in his voluminous published works and personal papers. Dyer's book asks a number of important questions. In what proportions do popular thought and formal racial theory appear in Roosevelt's attitudes? What was the intellectual context of his speculations on race? How was his racial thought related to broader areas of intellectual activity such as natural science and social philosophy? How did Roosevelt regard various white and nonwhite ethnic groups? How did Roosevelt's racial thought conform to the prevailing philosophies of the late nineteenth and early twentieth centuries? Historians have traditionally disagreed about the character of Theodore Roosevelt's racial ideology. Dyer's illuminating study clarifies many of the relevant issues by viewing Roosevelt's racial theory as an integrated whole.***

Reading McDowell: On Mind and World brings together an exceptional list of contributors to analyse and discuss McDowell's challenging and influential book, one of the most influential contributions to contemporary philosophy in recent years. In it McDowell discusses issues in epistemology, philosophy of mind and ethics as well as surveying the broader remit of philosophy. Reading McDowell clarifies some of these themes and provides further material for debate across philosophy of mind, ethics, philosophy of language and epistemology. The internationally renowned contributors include: Richard Bernstein, Gregory McCulloch, Hilary Putnam, Charles Taylor, Crispin Wright, Jay Bernstein, Rudiger, Bubner, Robert Pippin, Charles Lamour, Axel Honneth, Barry Stroud, Robert Brandom and Michael Williams. In conclusion, John McDowell responds to all the contributions. This critical contribution to analytic philosophy is likely to shape philosophical debate for years to come. It will be of interest to professional philosophers, as well as
