Guide to Studying Abroad

The Rough Guide

This comprehensive update of the now classic text applies the most current findings across disciplines to the treatment of pathogenic human stress arousal. New and revised chapters bring together the art and science of intervention, based in up-to-date neuroscience, starting with an innovative model tracing the stress-to-disease continuum throughout the systems of the human body. The authors detail the spectrum of physiological and psychological treatments for the stress response, including cognitive therapy, neuromuscular relaxation, breathing exercises, nutritional interventions, and pharmacotherapy. They also assess the strengths and limitations of widely-used measures of the stress response and consider the value of personality factors, cultural considerations, and resilience in stress mediation. Included in the coverage: The anatomy and physiology of the human stress response. Advances in neuroscience: implications for stress. Crisis intervention and psychological first aid. Neurophysiological rationale for the use of the relaxation response. Physical exercise and the human stress response. The pharmacological management of stress reactions. Disaster Mental Health Planning. Cultural Awareness and Stress. The Fourth Edition of A Clinical Guide to the Treatment of Human Stress Response offers readers a dual perspective, exceedingly useful in examining the origins of the stress response, and in preventing and treating the response itself. This rich integrative volume will join its predecessors in popularity among practitioners and students across disciplines and specialties. This volume presents a short guide to the extensive literature concerning semirings along with a complete bibliography. The literature has been created over many years, in variety of languages, by authors representing different schools of mathematics and working in various related fields. In many instances the terminology used

is not universal, which further compounds the difficulty of locating pertinent sources even in this age of the Internet and electronic dissemination of research results. So far there has been no single reference that could guide the interested scholar or student to the relevant publications. This book is an attempt to fill this gap. My interest in the theory of semirings began in the early sixties, when together with Bogdan Wójciorz I tried to investigate some algebraic aspects of compactifications of topological spaces, semirings of semicontinuous functions, and the general ideal theory for special semirings. (Unfortunately, local algebraists in Poland told me at that time that there was nothing interesting in investigating semiring theory because ring theory was still being developed). However, some time later we became aware of some similar investigations having already been done. The theory of semirings has remained "my first love" ever since, and I have been interested in the results in this field that have been appearing in literature (even though I have not been active in this area myself).

From its first edition the purpose of Walford has been to identify and evaluate the widest possible range of reference materials. No rigid definition of reference is applied. In addition to the expected bibliographies, indexes, dictionaries, encyclopaedias, and directories, a number of important textbooks and manuals of general practice are included. While the majority of the items are books, Walford is a guide to reference material. Thus periodical articles, microforms, online and CD-ROM sources are all represented. In this volume a particular effort has been made to improve coverage of the latter two categories.

The first comprehensive book on Bollywood dance culture, *Is It All About Hips?* traces Bollywood dances as they are interpreted, created, and produced in three locations: Mumbai (India), Kathmandu (Nepal), and Los Angeles (USA). In this pioneering work, Sangita Shresthova brings alive the world of Bollywood dance through the chronicling and analyses of live performances, dance classes, film spectatorship, and personal narratives. Watch how dances travel and meanings unravel...

The concept of social transformation has been increasingly used to study significant political, socio-economic and cultural changes affected by individuals and groups. This book uses a novel approach from the gender perspective and from bottom up to analyse social transformation in Nepal, a country with a complex traditional structure of caste, class, ethnicity, religion and regional locality and the experience of the ten-year of People's War (1996-2006). Through extensive interviews with women in post-conflict Nepal, this book analyses the intended and unintended impacts of conflict and traces the transformations in women's understandings of

themselves and their positions in public life. It raises important questions for the international community about the inevitable victimization of women during mass violence, but it also identifies positive impacts of armed conflict. The book also discusses how the Maoist insurgency had empowering effects on women. The first study to provide empirical evidence on the relationship between armed conflict and social transformation from gender's perspectives, this book is a major contribution to the field of transitional justice and peacebuilding in post-armed-conflict Nepal. It is of interest to academics researching South Asia, Gender, Peace and Conflict Studies and Development Studies.

There has been growing concern about "failed states" around the world, and since the massacre of the Royal family in Nepal in 2001 increasing media attention has focused on the decline of the state and the rise of the Maoist rebels in this Himalayan kingdom where so many Westerners have taken trekking vacations.

Development was always going to be a problem in Nepal, but few predicted the precipitous collapse of the state in rural areas in the face of the Maoist insurgency beginning in 1996 due, to a large extent, to the failure of the state to deliver promised development and benefits; instead, it became more and more authoritarian, even oppressive. Exploring the complex relationship between a modernizing, developmentalist state and the people it professes to represent, these fascinating and readable accounts of ordinary people's lives depict the various contexts out of which the Maoist insurgency grew.

TRY THIS Innovative exercises illustrate what you've learnt and how to use it. International development efforts aimed at improving girls' lives and education have been well-intended, somewhat effective, but ultimately short-sighted and incomplete. This is because international development efforts often operate under a reductive understanding of the term 'gender' and how it influences the lives of girls and boys. Gender is more commonly conceived by international efforts as characteristics which are ascribed to girls as norms for behaviour. In particular, the analysis in *Gender Trouble Makers* focuses on the social constructions of gender and the ways in which gender was reinforced and maintained through a case study in rural Nepal. In developing countries like Nepal, promoting access to and participation in existing formal education programme is clearly necessary, but it is not, in itself, sufficient to transform gender power relations in the broader society. When gender is properly addressed as a process, then all stakeholders involved - researchers, governmental officials, and community members - can begin to understand and devise more effective ways to increase both girl and boy students' enrollment, participation, and success in school.

Are reports of the death of conventional fieldwork in anthropology greatly exaggerated? This book takes a critical look at the latest developments and key issues in fieldwork. The nature of 'locality' itself is problematic for both research subjects and fieldworkers, on the grounds that it must now be maintained and represented in relation to widening (and fragmenting) social frames and networks. Such developments have raised questions concerning the nature of ethnographic presence and scales of comparison. From the social space of a cybercafe to cities in India, the UK and South Africa among others, this book features a wide range of ethnographic studies that provide new ways of looking at the concepts of 'locality' and 'site'. It shows that rather than taking key fieldwork processes such as globalization and mobility for granted, anthropologists are well-placed to examine and critique the totalizing assumptions behind these notions.

New Horizons in Medical Anthropology is a festschrift in honor of Charles Leslie whose influential career helped shape this subfield of anthropology. This collection of cutting-edge essays explores medical innovation and medical pluralism at the turn of

the 21st century. The book accomplishes two things: it reflects recent research by medical anthropologists working in Asia who have been inspired by Charles Leslie's writing on such topics as medical pluralism and the early emergence of what has become a globalized biomedicine, the social relations of therapy management, and the relationship between the politics of the state and discourse about the health of populations, illness, and medicine. The book also takes up lesser known aspects of Leslie's work: his contribution as an editor and the role he played in carrying the field forward; his ethics as a medical anthropologist committed to humanism and sensitive to racism and eugenics; and the passion he inspired in his co-workers and students. Charles Leslie is a remarkable and influential social scientist. *New Horizons in Medical Anthropology* is a fitting tribute to a sensitive scholar whose theories and codes of practice provide an essential guide to future generations of medical anthropologists.

Providing a comprehensive critique of the Constitution adopted in 1990, this book identifies it as an important factor in the exclusion of various ethnic and minority groups. It examines the causes for the lack of democratic consolidation in Nepal and outlines alternative institutions that can give voice to the various socio-cultural groups in the country. Dr Lawoti makes a case for setting up a new Constituent Assembly and for following the principle of self-determination to reform the polity. He also makes several important recommendations for the construction of an inclusive and democratic Nepal.
