This text provides the reader with a transdisciplinary, global studies perspective of the political significance of globalization as articulated in today's three main globalisms: market globalism; justice globalism; and religious globalism. Globalization and Ideology: A Global Studies Perspective brings together subjective and objective aspects of globalization that are usually treated separately from each other. Focusing on the transformation of the contemporary ideological landscape, the book is divided into three parts containing an original preface and nine chapters. Collectively, the chapters respond to a broad range of questions, including:

- How are political ideologies and social imaginaries being transformed in the global age?*
- What sorts of ideological claims are being generated by the three main globalisms?*
- How do these political ideas play out in concrete social, political, and cultural contexts?*
- How do globalisms shape urban spaces and popular images, and how, in turn, are they shaped by global ideologies?*
- How are traditional academic disciplines like political theory responding to global flows of ideas and theories that cut across conventional scholarly boundaries?*
- What does the fledgling field of global studies contribute to new forms of knowledge on these subjects?*
- What is the relationship between globalizing ideologies and post-9/11 'American Empire'?*
- Why has there been a surge of religious globalisms such as jihadist Islamism, Christian global fundamentalism, Falun Gong syncretism, and Buddhism?*
- Is the World Social Forum an effective site of ideological counter-production, capable of generating appealing political visions of 'another world' opposed to market globalisms?*
- Has the lingering Great Recession halted the worldwide ascent of neoliberalism or will it regain its former glory?*
- Rather than reaching the 'end of ideology', are we entering a*

new era of (global) ideological struggle?

The ELCA Division for Congregational Ministries and Augsburg Fortress Publishers are proud to continue their work on Renewing Worship, the multi-year program to develop basic Lutheran worship materials for the new century. Since 1978, the Lutheran Book of Worship has been the primary English language worship resource for many Lutherans throughout the world. In a process that includes numerous expert consultations, congregational feedback, and input from all branches of the church, Renewing Worship will provide the means to develop worship materials that reflect the diversity, vitality, and growth of the Lutheran Church today. Each year several volumes of provisional Renewing Worship material will appear, presenting to the church at large worship ideas for use and evaluation. A feedback form will be included in every volume, so input can be easily provided. Additionally, the program's website (www.renewingworship.org) will continue to provide background, overview, evaluation forms, and sample content for all available material, throughout the process. Based upon The Use of the Means of Grace, this volume will provide foundational principles in the areas of language, music, preaching, and worship space, for study and response throughout the church.

It is very important that children learn to pray. There are many cases where children find themselves as targets for devastating evil attacks. Some have even lost their lives, by becoming human sacrifices upon occultic altars. Though it is important for parents to cover their children, there are countless children who find themselves in homes where there is no spiritual covering. Moreover, the devil understands the threat children pose to his kingdom once they come of age and mature in the way of the Lord. As a result, there is a satanic agenda to take children out prematurely before they rise to prominence, especially those with great destinies. The bible records in Exodus 1:22 that Pharaoh passed a decree to cast all the Hebrew new born sons in to the river Nile to end their life.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models of developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's work turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) led to most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "O" stands for zero content cells or developing cells. It has been a major typographical problem that printers are unable to distinguish between O (zero) and o. Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way "DOL". Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book.

who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose the theory of L systems has been most significant.

Proud of Their Heritage and Sustained by Their Faith, They Came to Tame a New Land She had promised herself that once they left the fjords of Norway, she would not look back. After three long years of scrimping and saving to buy tickets for their passage to America, Roald and Ingeborg Bjorklund, along with their son, Thorliff, finally arrive at the docks of New York City. It was the promise of free land that fed their dream and lured them from their beloved home high above the fjords of Norway in 1880. Together with Roald's brother Carl and his family, they will build a good life in a new land that promises untold wealth and vast farmsteads for their children. As they join the throngs of countless immigrants passing through Castle Garden, they soon discover that nothing is as they had envisioned it. Appalled by the horrid stories of fellow immigrants bilked of all their money and forced to live in squalid living conditions, the Bjorklunds continue their long journey by train as far as Grand Forks. From there a covered wagon takes them into Dakota Territory, where they settle on the banks of the Red River. But there was no way for them to foresee the price they will have to pay to wrest a living from the indomitable land. The virgin prairie refuses to yield its treasure without a struggle. Will they be strong enough to overcome the hardships of that first winter?
