*Now in its second edition, this internationally best-selling book has been revised and updated. It focuses on helping people overcome some of the most common obstacles to successful publication. Lack of time? An unconscious fear of rejection? Conflicting priorities? In this, the first book to address the subject, Abby Day explains how to overcome these obstacles and create publishable papers for journals most likely to publish them. She shows how to identify a suitable journal and how to plan, prepare and compile a paper that will satisfy its requirements. She pays particular attention to the creative aspects of the process. As an*

*experienced journal editor and publisher, Dr Day is well placed to reveal the inside workings of the reviewing procedure - and the more fully you understand this, the greater the chance that what you submit will be accepted and published. For academic and research staff, in whatever discipline, a careful study of Dr Day's book could be your first step on the road to publication.*

**The 6th Conference on Security and Cryptography for Networks (SCN 2008) was held in Amalfi, Italy, on September 10-12, 2008. The first four editions of the conference were held in Amalfi, while, two years ago, the fifth edition was held in the nearby Maiori. This year we moved back to the traditional location. Security and privacy are increasing concerns in computer networks such as the Internet. The availability of fast, reliable, and cheap electronic communication offers the opportunity to perform, electronically and in a distributed way, a wide range of transactions of a most diverse nature. The conference brought together researchers in the fields of cryptography and security in communication networks with the goal of fostering cooperation and exchange of ideas. The main topics of the conference this year included anonymity, implementations, authentication, symmetric-key cryptography, complexity-based cryptography, privacy, cryptanalysis, cryptographic protocols, digital signatures, public-key cryptography, hash functions, identification. The international Program Committee consisted of 24 members who are top experts in the conference fields. The PC received 71 submissions and selected 26 papers for presentation at the conference. These proceedings include the 26 accepted papers and the abstract of the invited talk by Shai Halevi.**
