"An audacious and concrete proposal...Half-Earth completes the 86-year-old Wilson's valedictory trilogy on the human animal and our place on the planet." —Jedediah Purdy, New Republic In his most urgent book to

date, Pulitzer Prize-winning author and world-renowned biologist Edward O. Wilson states that in order to stave off the mass extinction of species, including our own, we must move swiftly to preserve the biodiversity of our planet. In this "visionary blueprint for saving the planet" (Stephen Greenblatt), Half-Earth argues that the situation facing us is too large to be solved piecemeal and proposes a solution commensurate with the magnitude of the problem: dedicate fully half the surface of the Earth to nature. Identifying actual

regions of the planet that can still be reclaimed—such as the California redwood forest, the Amazon River basin, and grasslands of the Serengeti, among others—Wilson puts aside the prevailing pessimism of our times and "speaks with a humane eloquence which calls to us all" (Oliver Sacks).

The story begins in Jerusalem in 70 AD as Abraham the Temple scribe flees the destruction of his home. Two thousand years and a hundred generations later, another Abraham perishes, immolated in the fires of

learn to appreciate (even be amazed by) events unfolding within, even as the external world creates constant struggles. Taking a fresh look at the concept of happiness, Hollis uses a warm, accessible tone to encourage readers to learn to tolerate ambiguity, embrace growth rather than security, respect the power of Eros, engage spiritual crises, and acknowledge the shadow of mortality. Shocking and controversial when it was first published in 1939, Steinbeck's Pulitzer Prize-winning epic remains his undisputed masterpiece. Set against the background of dust bowl Oklahoma and Californian migrant life, it tells of the Joad family, who, like thousands of others, are forced to travel West in search of the promised land. There are no universally accepted standards for developing systematic reviews leading to variability in how conflicts of interest and biases are handled, how evidence is appraised, and the overall scientific rigor of the process. In Finding What Works in Health Care the Institute of Medicine (IOM) recommends 21 standards for developing high-quality systematic reviews of comparative effectiveness research. The standards address the entire systematic review process from the initial steps of formulating the topic and

The masterpiece of Steinbeck's later years, East of Eden

is a sprawling epic in which his most mesmerizing characters and enduring themes were created and explored: the mystery of identity, the inexplicability of love, and the murderous consequences of love's absence. Set in the rich farmland of California's Salinas Valley, this expansive and often brutal novel follows the intertwined destinies of two families, the Trasks and the Hamiltons, whose generations helplessly reenact the fall of Adam and Eve and the poisonous rivalry of Cain and Abel. East of Eden was a 1955 film introducing James Dean, the book that revived Oprah's Book Club, considered by Steinbeck to be his magnum opus, and has remained vitally present in American culture for over half a century.
